

AUGUSTANA CHAPEL

Ask an usher for a receiver and earphone. You may bring your own wired earphone / headphone. The Chapel system does not allow for a smart phone connection.

AUGUSTANA SANCTUARY

The instructions below are for using your own phone/device to access the audio feed. You then use your phone settings to connect:

- wired earphones or headphones
- bluetooth ear buds
- bluetooth hearing aids

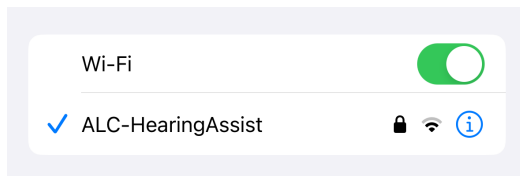

If you do not have a smart phone, ask an usher for a portable receiver and earpiece. You may attach your own wired earphones or headphones.

FOR THE SANCTUARY SYSTEM:

1. Download **WaveCAST Audio Receiver** from the App Store onto your smart phone. The logo is shown here.

2. Connect your smart phone to the wifi network labeled "ALC-HearingAssist." Password: Connect2ALC

3. Once your smart phone is connected to the network, open the WaveCAST Audio Receiver app and select Augustana-Hearing-Assist.

- a. If Augustana-Hearing-Assist does not appear, enter the IP address 192.168.1.191 into the search bar, and the correct feed will be listed for you to select.

- b. Select the heart next to the name of the feed to prevent further connection issues.

4. The assisted listening feed will now play through any connected listening device.
